

## Join the BidMagic Partner Program

BidMagic is the fastest growing professional proposal software for AV and Security installation companies.

Every day, installing dealers ask us help them with a simpler solution to access product and pricing information from their manufacturers and distributors. It is a daunting task for individual dealers to acquire this information from hundreds of sources and keep it current.

They just do not have the time to enter all these products into their systems.

### Help Your Dealers Connect to Your Products

By joining this FREE program, you will help your dealers purchase more products from you with less hassle. We have over 100,000 products in our online product library and we would like to include your products at no cost to you.

This should also help you acquire new dealers who are attracted by this much appreciated customer service.

To become a BidMagic Partner, we ask that you simply:

1. Sign and fax back the partner form agreeing to furnish your product data.
2. Provide a contact source in your office for future communications.
3. Submit an excel spreadsheet via email containing your products.

We need this in an Excel spreadsheet format from you containing your products and MSRP or MAP pricing. We also need product images. If you already supply this information, we would like to review the format you currently use. We can supply an Excel template for you.
